

ECA Bond Breaker Tape

Polyethylene Tape

Description

Bond Breaker Tape is a polyethylene tape used to fill a gap in the joint if the depth is not deep enough to use Joint Backer Rod and to prevent three way adhesion of the sealant. This ensures the correct and uniform sealant depth along the whole length of the joint.

Advantages

- Quick and easy to apply
- Reduces sealant usage
- Improves sealant performance by obtaining easily the correct joint dimensions
- Flexible – won't bubble or blister.
- Stops 3 way adhesion of a sealant eliminating
- movement cracks.

Recommended For

For reducing the depth of joints in construction/ glazing use. Creating a backstop to allow proper sealant tooling.

Available in

Available in black in the following sizes: 50mm x 3.5m x thick 5mm
40 mm x 3.5m x thick 5 mm.

Health and Safety

For further information see the Bond Breaker Tape Material and Safety Data Sheet, or consult our technical department.

Storage

This product must be stored in a dry place.

Technical Service

The Technical Department is available to assist you in the correct use of our products and its resources are at your disposal entirely without obligation.
